-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in the reply filed on March 23, 2006 is acknowledged. The traversal is on the ground(s) that the claims of Group I and Group II should be rejoined since they are subcombination/combination. This is found persuasive and claims 1-4 and 6 and rejoined.

The requirement is still deemed proper and is therefore made FINAL.

Claim Objections

2. Claims 1 and 6 are objected to because of the following informalities: It has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-4 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Faville et al., U.S. Pat. No. 6,562,496 B2.

Faville et al., teach an integrated self-cooling plant support module for incorporation into a fuel cell system including a fuel cell assembly (abstract), the module disposed in an enclosure having an air distribution system (col. 3, lines 25-28; Fig. 1), the module comprising an inlet port in a wall of the enclosure (col. 3, lines 50-62), a motor, a blower (col. 3, lines 37-49), a control module (col. 3, lines 46-49), a first shroud and a second shroud (Fig. 1). It teaches an air filter (col. 3, lines 37-41). It teaches control module is provided with a heat sink (col. 3, lines 30-36). It teaches air discharged to fuel cell assembly is at a higher temperature (col. 2, lines 8-19). It teaches a solid oxide fuel cell system comprising the above described integrated self-cooling plant support module (abstract).

Thus, the claims are anticipated.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gillett et al., U.S. Pat. No. 6,764,784 B2, teach a fuel cell generator apparatus where a modular housing encloses fuel cell subassemblies and is further surrounded by a vessel.
